

# Wooden Owl Craft

## Materials:

- 1 large circular log slice
- 2 medium-sized circular branch cut-offs
- 2 smaller circular branch cut-offs
- 1 pine cone
- 2 small pom-poms
- string
- white glue (such as PVA)

## Instructions:

1. Glue a few longer feathers on the sides of the large circular log slice to make wings. Add smaller feathers near where the eyes will be, making sure they are pointing outwards to create the eyebrows.
2. Take two medium-sized branch cut-offs and glue them onto the circular log to form eyes.
3. Take two smaller branch cut-offs and add some extra strong glue on one side of each. Place on top of the medium-sized ones, then glue two small brown pom-poms on top. Leave to dry.
4. Glue a pine cone in the gap between the eyes to create your owl's nose and leave to dry.
5. Cut approximately 5cm of string and tie it into a loop. Glue in place at the back of your owl and leave to dry.
