

# Make Your Own Fun Binoculars

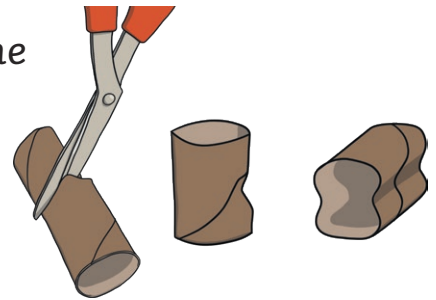

## What you need:

- Toilet roll tubes x 3
- Ribbon
- Split pins
- White Glue
- Paint
- Scissors

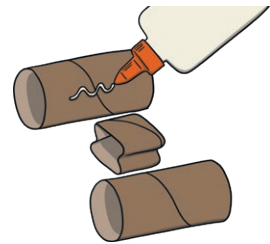

## What to do:

1. Cut one of the toilet roll tubes in half. Take one of the halves and squeeze this between your fingers to make a sand timer shape. This will form the central part that holds the other two tubes together.

2. Place the other two toilet roll tubes on either side of the central piece. Glue these in place to hold the two tubes together.

3. Paint your binoculars using any colours and patterns you like.

4. Carefully poke a hole into the bottom of each tube which is 2cm from the end. Use your split pins to attach the ribbon to your binoculars by pushing the split pin through the end of the ribbon and then through each hole. Secure by splitting the pin inside the tube.
